STEFANIE GILBERT
CROSSCOUNTRY MORTGAGE®

A clearer picture. A next step.

Your Debt Management Calculator • 5 easy steps

1. **Start with you.** Enter your first name. There is no credit pull.
2. **Tell us about your home.** Estimate its value. Choose the property type, how you use it and your credit range.
3. **List your debts.** Replace the examples with your own balances, rates and payments. Include your home loan. Use principal and interest only for that payment.
4. **See your numbers.** Review your current costs and the estimated Debt Restructure payment. Enter a mobile number or email to unlock your strategies and request follow-up.
5. **Choose a direction.** Compare saving the difference, splitting it, or paying down the loan. Red means behind keeping your current debts. A lower payment alone does not mean you come out ahead.

What is a blended rate? One average rate for all your debts. Bigger balances count more. It is not your Debt Restructure rate.

The 3 strategies: Save It puts the positive monthly difference into savings. **Split It** saves half and pays half toward the loan. **Pay It Down** puts it toward the loan. The difference can shrink as old debts pay off.

Send your results: Tap Text or Email. Your app opens with the report. Tap Send. For your own copy, enter your email and tap Open email with my results. Stefanie is copied. If the message is too long, tap Copy my results and paste it.

Keep it handy: iPhone Safari: Share > Add to Home Screen.
Android Chrome: three dots > Add to home screen.

Estimates only. Taxes and insurance are extra. A Debt Restructure is secured by your home. Rates and savings yields can change. This is not a loan offer.
